

REMARKS

The Office Action dated October 10, 2003 consisted of a Notice to File Corrected Application Papers, to wit, a substitute specification in compliance with 37 CFR 1.52, 1.121(b)(3), and 1.125 is required in order to correct the line spacing of the originally filed Divisional patent application from a line spacing of 1 to a line spacing of 1½ or double spaced. No other requirement was made by the Patent Office. Applicants hereby state that the submitted substitute specification, claims and abstract includes no new matter, the only change made being was to change the line spacing to 1½ as required by the Examiner.

In compliance with the above-cited CFR sections, Applicants include a copy of the original specification, abstract and claims, which had a line spacing of 1, suitably marked to show that the entire specification, abstract and claims have been deleted and a clean version of the original specification, abstract and claims with the correct line spacing of 1½ is provided.

In view of the above amendments and remarks, this application is now believed to be in condition for examination by the Patent Office.

Respectfully submitted,

Robert M. Poteat
Attorney for Applicant
Registration No. 22,189
